SUMMARY AND OBJECTIVE

I am a recent graduate from Ball State University with a bachelor's degree in computer science. I have had a strong interest in programming since I started learning in middle school. Most of my skill set is with web development, but I have also greatly enjoyed participating in software development projects throughout college. I am self-driven, eager to learn, and passionate about advancing my skill set for the benefit of myself and those I work with. For more about me, please visit my portfolio website: <https://maxbraun.us>.

EDUCATION

Ball State University, Indiana, 2018 – 2022

B.S. in Computer Science

SKILLS

Development Skills: React, Node.js, REST API, MongoDB, HTML, CSS, JavaScript, WordPress, PHP, MySQL

Soft Skills: Teamwork, Organization, Written & Verbal Communication

PROJECTS

More projects and information available at <https://maxbraun.us>

Project: <https://pearprogramming.co>

Description: Pear Programming is a place for entry level developers to share project ideas and work together to build their portfolios and teamwork skills. The client is built with React, and the API with Node.js and Express, using MongoDB as the database. The client is hosted with Netlify, and the API is hosted with Render. Pear Programming also uses Cloudinary to host image uploads.

Technology Used: React, Node.js, MongoDB, HTML, CSS, GitHub, Netlify, Render, OAuth, Cloudinary

Project: *Capstone (Building Better Drug Ads)*

Description: For this project, I worked together with 2 of my Software Engineering classmates to design, develop, and deploy a website for our client, Robert Gold. We used HTML, CSS, and JavaScript for the front end, and PHP and MySQL on the backend.

Technology Used: PHP, MySQL, JavaScript, HTML, CSS, XAMPP, GitHub

WORK EXPERIENCE

Web Developer - Seattle Engraving Center

May 2022 - Present

- Using Node.js to build a program that automates the listing of distributor products onto GunBroker.com.
- Building and migrating the company's main ecommerce website from Shopify to WordPress/WooCommerce.
- Rebuilding the companies secondary sales channel website on WordPress, massively increasing sales, customer interaction, and overall user experience.
- Using CSS, PHP, and jQuery to customize and add functionality to both WordPress websites.
