WORK EXPERIENCE

District Cinema

January 2025 – Present

Software Engineer

Tampa, FL - Hybrid

- Developed and maintained features of [Vū Studio](#) using SvelteKit, TypeScript, PostgreSQL, and Drizzle.
- Planned, developed and deployed the “Teams” feature, allowing organizations to form teams and share files, resources, and permissions.
- Led a marketplace redesign and Stripe integration epic, improving user and admin experience.
- Owned the TypeScript media processor subsystem, acting as the go-to engineer for architecture decisions, debugging, and integration support.
- Implemented end-to-end testing with Playwright to improve code reliability and deployment confidence.
- Built a depth extrusion application leveraging Apple’s DepthPro AI model, Three.js, WebSockets, and FastAPI.
- Integrated Cloudflare Turnstile to prevent bot signups and strengthen platform security.

TypeWorks

March 2024 – Present

Full-Stack Developer

Remote

- Collaborated with the lead developer to deliver app features based on customer requirements.

Seattle Engraving Center

May 2022 – January 2025

Web Developer

Tampa, FL

- Created two JavaScript scripts that automate product listing on multiple platforms, driving the company to top 100 seller status on one platform and increasing efficiency by replacing the duties of one full-time employee.
- Migrated the company’s primary and secondary sales websites to WordPress.

PROJECTS

SailFuture Live Expedition Tracker | <https://expeditions.sailfuture.org>

March 2024 – Present

- Worked alongside lead developer to implement features within Next.js application.
- Translated Figma designs into functional React components.
- Built API endpoints to fetch, manipulate, and return database data.

Product Listing Automation | <https://github.com/maxbraun1/GunbrokerAutomation>

March 2023

- Created two JavaScript scripts to automate the merchandise posting process.
- Interacted with distributor’s REST APIs to source inventory.
- Optimized programs to list about 1000 items in the time it previously took to list 1 item.

Hypixel Guild Finder | <https://hypixelguildfinder.com>

August 2024 – Present

- Built a web app to help players of the Hypixel Minecraft server find a guild to join.
- Used Next.js, TypeScript and Supabase to quickly assemble a full-stack application.
- Interacted with Hypixel’s REST API to source player and guild data.

EDUCATION

Ball State University

August 2018 – July 2022

Bachelor of Science in Computer Science

Muncie, IN
